I confirmed with Dot, the bags will be fine.

Thanks!

Dot – I know Kathy, Greg, and David have discussed homogenization procedure. I think they decided on using gallon plastic bags, but I'll let them confirm.

The one thing I would like to see is that when split samples are collected, the sample material from the trowels is placed in a stainless steel large mixing bowl and homogenized before splitting. Only after the soil is mixed and homogenized should it then be put into the jars.

Dot

Hello,
I have no additional comments on the submitted workplan addendum.

Thanks
Greg
